### PROFESSIONAL EXPERIENCE

Carmen Walker is a consultant environmental scientist at EcoScience NT, with over a decade of experience in Northern Australia. She holds a bachelor's degree in environmental management and has participated in a diverse range of research and technical projects across the Top End. Her expertise includes field surveys for flora and weed assessments, university research programs on terrestrial and blue carbon sequestration, ground truthing for vegetation mapping and GIS projects for the NT Government. She has also played an integral role in a major mangrove rehabilitation project as well as numerous mangrove assessment and monitoring projects in Darwin Harbour. Throughout her work she has demonstrated exemplary field skills and a strong understanding of vegetation ecology and botany, utilizing specialized technical equipment to collect scientific data. Additionally, she has extensive experience in scientific data processing and entry, conference organization, website development, and scientific communication. Carmen's ecological experience extends to vegetation communities of the Wet Tropics and marine communities of the Great Barrier Reef.
